

IoTShipping.xyz FRAUD/LOSS/THEFT PREVENTION

Our temperature-sensitive Smart Sensors are paper-thin.

They can easily be integrated onto a medicine bottle or into a label on any size vial, carton or both.

Prevent your property from being stolen, mishandled, misplaced or subject to fraud by securing it with our smart-sensor device.

It is invisible and undetectable.

Our smart sensors monitor in Real Time:

- Movement**
- Geo-location**
- Temperature**
- Humidity**

Global Fund has provided **\$837 million**. Officials have realized that in addition to battling the issue of these free drugs being used outside of their intended scope, there needs to be a focus on the legal implications of those caught stealing.

Read the full Global Fund Theft Report [HERE](#)

Namely anti-malarial medication known as Artemisinin-Combined Therapy (ACTs) – are stolen from the public health system... **found that 35% of the private clinics tested sold stolen donor-funded ACTs with Global Fund-financed ACTs found in 19% of the clinics. The highest price paid for ACTs during this survey was **US\$11**, indicating a strong financial incentive to steal medicines for retail sale.**

RFI

Disturbed by allegations of diverting anti-malaria drugs supplied by The Global Fund to assist less privileged in the society. The Nigerian government has set a plan in action to deal with officials who diverted the drugs from their original destination. A National Council of Health meeting was told that out of the over 16 million doses distributed to health facilities in 13 states of Nigeria last year. Only about 8 million doses were reported to have reached their destination, whereas the remaining were diverted. RFI's David Coffey spoke to Bashir Ibrahim Idris from RFI's Hausa Service

- **Some things are irreplaceable.**
- **Why take the risk?**
- **Contact IoTShipping.xyz Today.**
- **Never Lose Track of Your Assets.**
- **Real-Time Monitoring.**
- **Theft/Fraud/Loss Prevention.**

Asset Tracking with IoT is a way to **get real-time visibility of 'blind flows'**. Enhanced control of physical flows will help Supply Chain **efficiency. This is what we do.**

Contact IOTShipping.xyz today.

Lead-time reduction initiatives based on a clear understanding of flow waiting times

Optimized planning and better priority management

New services for clients (visibility of delivery)

Using the **Internet of Things (IoT)** technology is today's most efficient and cost-effective way of asset tracking and traceability. Contact **IoTShipping.xyz** today. We'll get you started so your assets never get lost, stolen or compromised without your being alerted in real-time.

We identified three typologies of 'blind flows' where IoT adds value:

Intercontinental flows like sea-freight with long lead times

Production flows involving external players like suppliers or subcontractors

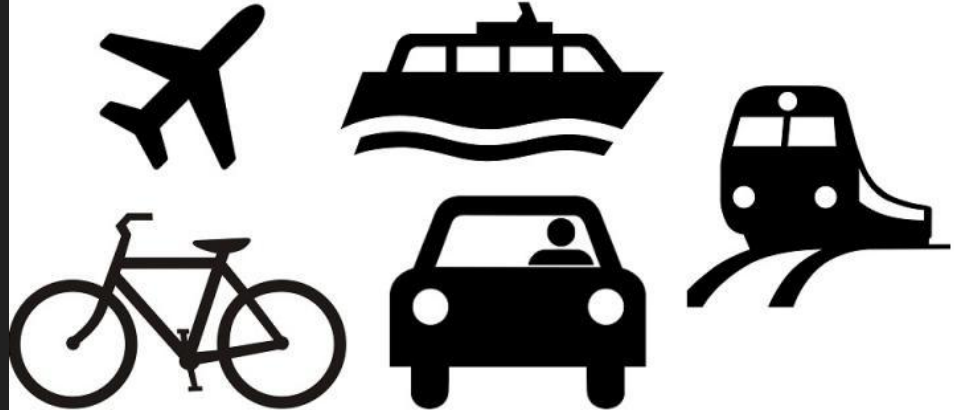

Equipment monitoring, like reusable packaging
