

Over £100,000 worth of Burgundy wine stolen from winery

More than 1,000 bottles of high-value Burgundy, including Echezeaux and Clos de Vougeot wines, have been stolen from the winery of Vosne-Romanée-based Domaine Forey.

Richard Woodard
May 22, 2019

The wines, including 998 bottles, nine magnums and 43 jeroboams, have a market value of well over £100,000, and include a number of large-format Grand Cru library vintages.

The **theft** from Domaine Forey's warehouse, which took place on the night of 9 May, was described as 'devastating', and is said to have left domaine owner Régis Forey **'heartbroken'**.

IoTShipping.xyz THEFT PREVENTION

Our temperature-sensitive Smart Sensors are paper-thin.

They can be integrated into a wine label, a carton label or both.

Thieves or other risk-factors will not even know that your wine is secured with a smart-sensor device.

It is invisible and undetectable.

Our smart sensors monitor in Real Time:

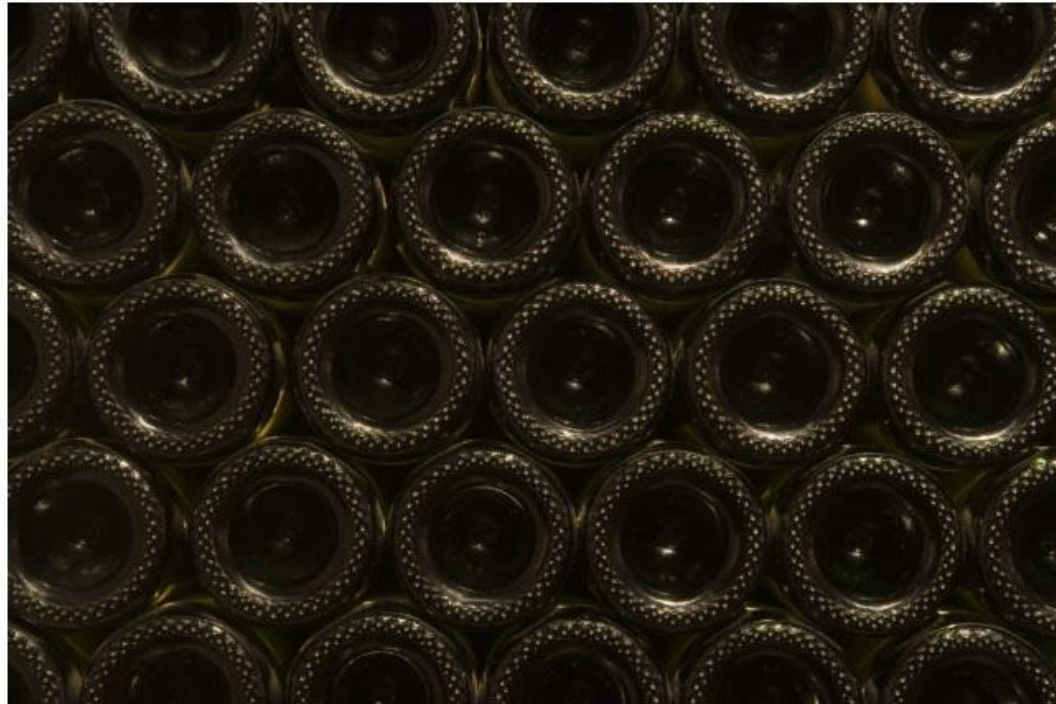

- **Movement**
- **Geo-location**
- **Temperature**
- **Humidity**

THIEVES STEAL 1,000 BOTTLES FROM BURGUNDY WINERY

23rd May, 2019 by Rupert Millar

Thieves have stolen over 1,000 bottles, many of them grand cru, worth more than £100,000 from Domaine Forey in Burgundy.

- **Some things are irreplaceable.**
- **Why take the risk?**
- **Contact IoTShipping.xyz Today.**
- **Never Lose Track of Your Assets**
- **Real-Time Monitoring.**

Asset Tracking with IoT is a way to **get real-time visibility of 'blind flows'**. Enhanced control of physical flows will help Supply Chain **efficiency. This is what we do.**

Contact IOTShipping.xyz today.

Lead-time reduction initiatives based on a clear understanding of flow waiting times

Optimized planning and better priority management

New services for clients (visibility of delivery)

Using the **Internet of Things (IoT)** technology is today's most efficient and cost-effective way of asset tracking and traceability. Contact **IoTShipping.xyz** today. We'll get you started so your assets never get lost, stolen or compromised without your being alerted in real-time.

We identified three typologies of 'blind flows' where IoT adds value:

Intercontinental flows like sea-freight with long lead times

Production flows involving external players like suppliers or subcontractors

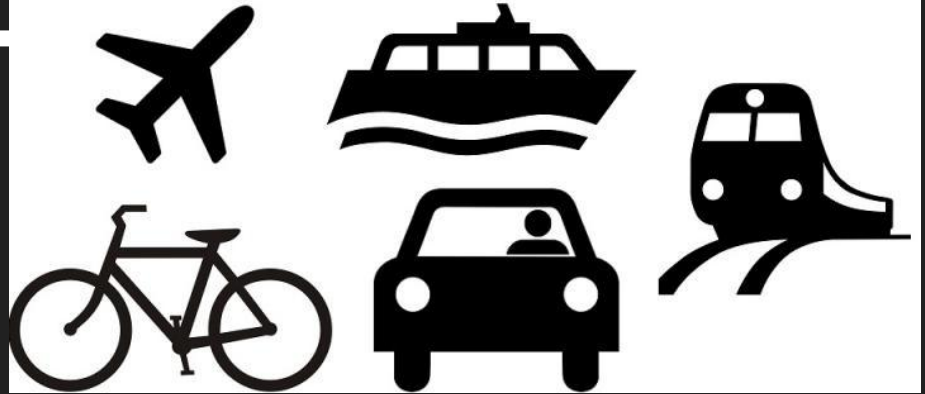

Equipment monitoring, like reusable packaging
